- Develop a program that calculates and prints the sum of the first n even numbers using a for loop.
- Implement a program that uses a for loop to iterate through an array of numbers and print only the even numbers.
- Implement a program that uses a loop to iterate through an array of numbers and remove all the even numbers from them and just leave the odd ones
- Write a program that defines a function to calculate the area of a circle. The function should take the radius as input and return the calculated area.
- Develop a program that reads a list of grades and uses the splice method to remove failing grades (below 50) from the array.
- Write a program that uses a function to find the largest element in an array of numbers
